

Farmer's Coop's new bulk oil delivery truck is now up and running. The truck contains three plastic tanks, which can hold a total of 880 gallons of oil. We are offering three products in bulk. [Qwiklift HTB](#), [Superlube TMS 15W-40](#), and [Indol anti-wear hydraulic fluid ISO 32 \(winter\) and ISO 46 \(summer\)](#). In addition, we will still be able to deliver and pump from 55-gallon drums into bulk containment. This means our full line of Cenex oils will be available for bulk storage and/or drum delivery.

To take advantage of our oil delivery program, we recommend getting set up with storage. FCA offers various sizes of tanks and is willing to sell or lease the complete oil storage set-up.

Why choose bulk oil over drums? There are various problems when using drums. Drums create messy spills, leave leftover product, include drum deposits, create clutter in your shop, cost more per gallon, and you have inventory uncertainty. With a bulk oil set-up you eliminate all these issues.

Call Eric Sobolik at 307-660-5634 or the FCA office at 307-682-4468 to place in order for delivery or storage tanks.
